TRUSTED PERFORMANCE

Modern tread design with optimized void arrangement increases the number of groove edges, significantly enhancing wet grip and stability.

ENHANCED TRACTION

Optimized contact patch design evenly distributes ground pressure, enhancing traction and control.

QUIET RIDE TECHNOLOGY

The innovative tread pattern, with additional tread blocks, minimizes noise and absorbs road impact, providing a quieter and more comfortable driving experience.

PERFORMANCES DE CONFIANCE

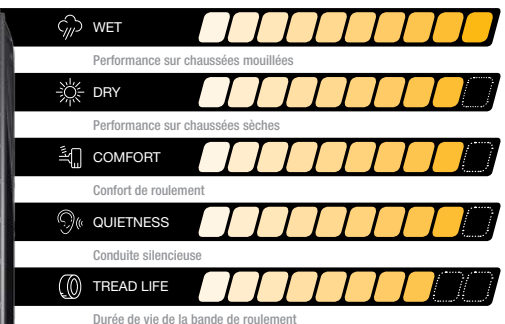

La conception moderne de la bande de roulement avec une disposition optimisée des zones de vide augmente le nombre d'arêtes de rainures, ce qui améliore considérablement l'adhérence sur la chaussée mouillée et la stabilité.

TRACTION AMÉLIORÉE

La conception optimisée de l'empreinte au sol répartit uniformément la pression au sol, améliorant ainsi la traction et le contrôle.

TECHNOLOGIE DE CONDUITE SILENCIEUSE

Comprenant davantage de pavés de gomme, le dessin novateur de la bande de roulement minimise le bruit et absorbe les chocs, offrant une expérience de conduite plus silencieuse et confortable.
